

## **MORE SPACE FOR PRODUCTION, RESEARCH & DEVELOPMENT AND ADMINISTRATION**

### **– BAUBLIES AG IS MOVING –**

Renningen, July 2020

Dear Sirs,

we're moving:

At our current location in Renninger Brunnenfeldstraße, Baublies has reached its spatial limits, and so we have invested in a new location in Raitestraße in Renningen. We are proud that we have succeeded in creating our new company headquarters within a year despite the major economic and health challenges posed by the Corona pandemic. The new building not only offers more modern workplaces for our employees, but also more space for production, Research & Development and for our administration. You too will benefit from this in the future.

This new building, which also meets all sustainability requirements, is a milestone in the history of Baublies, and the move is now approaching:

It will take place between August 10<sup>th</sup> and 21<sup>st</sup>, 2020. During this time we will try to be there for you under the usual telephone numbers and e-mail addresses. However, please understand if there are any delays during this period.

From August 24<sup>th</sup> we can be reached under the following new address:

**Baublies AG · Raitestraße 25 · 71272 Renningen**

Under the new roof, we are happy, if we may continue to accompany you as your permanent partner for tools for non-cutting surface machining. At the new location you will continue to be supported by your previous contact person under the usual telephone number and e-mail address. You will also have your personal contact person for questions concerning our move.

We hope that despite these turbulent times it will soon be possible to welcome you personally at our new location in the not too distant future.

We wish you all the best - and: Stay healthy!

With kind regards

Andreas Hadler  
Board of Directors
